Springer International

Oecologia

Derived from *"Zeitschrift für Morphologie und Ökologie der Tiere"*, *Oecologia* was founded in 1968, volumes (1968–1982), and edited by H. Remmert. As of volume 53 (1982) the journal has been edited by both H. Remmert and E.-D. Schulze. As of volume 81 (1989) the journal has been edited by J.R. Ehleringer, Salt Lake City; C.H. Peterson, Morehead City; H. Remmert, Marburg; E.-D. Schulze, Bayreuth. As of volume 83 (1990) the journal has been edited by J.R. Ehleringer, Salt Lake City; C.H. Peterson, Morehead City; M. Schaefer, Göttingen; E.-D. Schulze, Bayreuth.

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $0.20 per page per copy, plus a basic fee of US $2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0029-8549, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Aide TM: Synchronous leaf production and herbivory in juveniles of *Gustavia superba* 511
Andersen AN, Blum MS, Jones TH: Venom alkaloids in *Monomorium "rothsteini"* Forel repel other ants: is this the secret to success by *Monomorium* in Australian ant communities? 157

Bain JF → Flanagan LB
Balment RJ → Shore RF
Barnhisel DR: Zooplankton spine induces aversion in small fish predators 444
Baruch Z → Simoes M
Basset Y: Leaf production on an overstorey rainforest tree and its effects on the temporal distribution of associated insect herbivores •211
Belovsky GE, Schmitz OJ, Slade JB, Dawson TJ: Effects of spines and thorns on Australian arid zone herbivores of different body masses 521
Blondel J, Dervieux A, Maistre M, Perret P: Feeding ecology and life history variation of the blue tit in Mediterranean deciduous and sclerophyllous habitats 9
Bloom AJ → Koch GW
Blum MS → Andersen AN
Boutin S → Murray DL
Bowers MD → Stamp NE
Brand S → Shachak M
Brodbeck BV → Stiling P
Brown VK → Gange AC
Brulfert J → Kluge M
Bryant JP → Reichardt PB
Büns M, Ratte HT: The combined effects of temperature and food consumption on body weight, egg production and developmental time in *Chaoborus crystallinus* De Geer (Diptera: Chaoboridae) 470
Burns CW → Butler MI
Butler MI, Burns CW: The influence of temperature and resource level on the fecundity of a predatory planktonic mite, *Piona exigua* Viets 220

Cain ML, Carson WP, Root RB: Long-term suppression of insect herbivores increases the production and growth of *Solidago altissima* rhizomes 251
Cain ML, Pacala SW, Silander JA Jr: Stochastic simulation of clonal growth in the tall goldenrod, *Solidago altissima* 477
Caldwell MM → Williams K
Carson WP → Cain ML
Chapin FS III → Koch GW
Chapin FS III → Reichardt PB
Cipollini ML, Levey DJ: Why some fruits are green when they are ripe: carbon balance in fleshy fruits 371
Clausen TP → Reichardt PB
Clay K → Madej CW
Collins JP → Pfennig DW
Cowan CA → Peckarsky BL
Cromer RN → Leuning R

Daily GC, Ehrlich PR, Wheye D: Determinants of spatial distribution in a population of the subalpine butterfly *Oeneis chryxus* 587
Dang QL, Lieffers VJ, Rothwell RL, Macdonald SE: Diurnal variation and interrelations of ecophysiological parameters in three peatland woody species under different weather and soil moisture conditions 317
Davies WJ → Rhizopoulou S
Dawson TJ → Belovsky GE
DeCino RD → LeRoy Poff N
Dervieux A → Blondel J
Drost HJ → Vulink JT
Dryden G → Green B

Seed dispersal 371
Seed dormancy 515
Seed mortality 515
Seed preference 296
Seedling mortality 228
Seedling recruitment 435
Seed-set 574
Selaginella lepidophylla 597
Serengeti 153
Sesbania punicea 574
Sieve tubes 233
Silphium integrifolium 243
Siphonaria 274
Skin-source 15
Small mammals 383
Small-scale dynamics 48
Snow 463
Snowshoe hare 401
Solidago altissima 251, 477
Spatial distribution 435
Spatial variability 189
Stable carbon isotope composition 148
Stable isotopes 305
Starvation 422
Stoat 552
Stochastic simulation models 477
Stoneflies 277
Streamflow manipulation 577
Sturnus vulgaris 22
Survival 422
Symbiotic N-fixation 415

Temperature 30, 220, 289, 470
Terrestrial isoetids 258
Thermoregulation 72, 562
Thiols 109
Time lag 552
Tipulid 228
Trachypogon plumosus 173
Translocation 15, 233
Transpiration 125, 394
Tree bark 132
Treefall gaps 263
Trees 378
Trembling aspen 116
Trichapion lativentre 574
Trophic polymorphism 161
Tropical deciduous forest 362
Tropical forests 371
Tropical pasture 362
Tropics 511

Unpalatable plant 238

Varanus rosenbergi 547
Venom 157
Vertical migration 470
Vessels 233
Vicia sativa 228
Vole cycle 552

Water influx 547
Water mite 220
Water potential 305, 340
Water relations 41, 317
Water source 430
Water stress 173
Water turnover 529
Water use efficiency 457
Weight loss 296
Wood mouse 539

Xanthium canadense 55
Xylem transport 233

Yellow perch 444

Zimbabwe 378
Zooplankton 303
Zygogramma 204
